EMIRATES HOME NURSING

ABOUT US

Emirates Home Nursing was founded in 2010, as a healthcare provider, to help our society and provide patients with services they find in healthcare centres from the comfort of their homes.

Over the course of more than ten years in business, we succeeded in establishing ourselves as one of the top home care providers in the United Arab Emirates with a vast range of health services.

Why Choose EMIRATES HOME NURSING ?

Well-trusted team of professionals

Our team is committed to the guidelines set by the World Health Organization and the National Institute for Health and Care Excellence.

All our nurses have a Bachelor of Science Degree in Nursing and are licensed by the Dubai Health Authority.

Each staff member holds basic life support and first aid certification with a minimum of two years of experience across varied healthcare sectors.

Our nursing care can be customized to the needs of our clients, whether short-term, long-term, shift-schedule base hourly, daily, or weekly.

OUR SERVICES

We offer a wide range of services customized to the needs of our clients.

Pre & Post-Natal Care

Newborn & Child Care

Senior Care

Clinical Care

Pre & Post-Natal Care

- Guiding the mother through pregnancy.
- Newborn care for expectant and new mothers during the first weeks of the baby's life.
- Classes on how to navigate those critical first weeks of life with a new baby.
- Creating a birth plan
- Baby care
